

Gravity Curtain

Side door protection.

Hardware & trolley system

Velcro® fastens to side walls

May the force of gravity be with you. The Gravity Curtain ingeniously uses gravity to easily close the curtain behind the driver. Protecting inventory, increasing delivery speed, and driver friendly – that's the Gravity Curtain.

How it works?

- Curtain track mounted at a minimum of a 16" incline above the door opening
- Curtain moves up the track with one swift motion
- With the help of gravity, curtain moves down the track and closes automatically behind the driver

Why side door protection is necessary?

- Helps protect inventory
- Helps minimize reefer recovery time
- Conserves fuel while maintaining trailer temperatures

Standard Specifications:

- 18 oz. commercial grade vinyl
- 20 oz. vinyl sweep, trimmed on-site to fit trailer
- Extra Low Temperature window to withstand extreme temperatures
