## **Streamline Your Supply Chain and Elevate Your Side Door Access Products with New Randall Manufacturing Innovations at IFDA 2014**

**Elmhurst, IL (IFDA Distribution Solutions Conference, Randall Manufacturing, Booth #327) – September 29, 2014** – With more organizations looking to streamline procurement and the number of equipment suppliers they deal with, Randall Manufacturing is pleased to offer foodservice distributors a turn-key product portfolio for both temperature control and access products.

Foodservice distributors are increasingly challenged to maintain proper temperature control and product integrity. With a reputation for innovation, customization, and breadth of product line, Randall Manufacturing has long been considered the leading supplier of temperature control products – insulated bulkheads, center divide systems, insulated covers, rear and side door curtains, and chutes – to foodservice distributors.

In 2011, Randall Manufacturing introduced a new line of access products, Randall Access, which now includes straight and folding walkramps, platform systems, and steps. Randall Access combines 30 years of industry experience, feedback from the trenches, and an engineering attitude of – “we’re not leaving anything on the table.”

“At IFDA 2014, we’re bringing our two product lines - temperature control and access products- together in a way the market has not seen before,” said Fred Jevaney, president, Randall Manufacturing & Randall Access. “Having one solution for the foodservice delivery market not only streamlines order placement, invoice management, and reduces administrative time, but also creates a stronger partnership to meet our customers’ needs both inside and outside the trailer.”

### **KEY FACTS – RANDALL ACCESS’ 2014 CONCEPT PRODUCTS**

#### **FDP PLATFORM**

- The Randall Floor Deployed Platform (FDP) provides a means of unloading and delivering product quickly from the side doors.
- The Randall FDP Platform offers a robust 750 lb. weight capacity without the optional supporting leg or 1,000 lb. weight capacity with the optional supporting leg.

## **KEY FACTS – RANDALL ACCESS' 2014 CONCEPT PRODUCTS**

### **FDP PLATFORM cont.**

- Foodservice delivery companies and installers will appreciate that the Randall FDP Platform requires only three inches of floor space, not the typical four for weight capacity exceeding 500 lbs., for installation - saving space, time, and money.
- The expansive platform, 31 ½" wide x 35 ¼" deep, provides drivers with a safe and secure area for staging and unloading product.

### **FOLDING EL**

- The Folding EL, the latest addition to its line of Folding Walkramps, allows drivers to quickly and safely deploy a folding walkramp for use with the Randall Elevated Platform and is also compatible with competitors' middle door platforms.
- Positioned in an open carriage, running parallel with the trailer, the Folding EL quickly pulls out from under the trailer and with two quick motions attaches directly to the Randall Elevated Platform.
- The Folding EL continues Randall's tradition of full on strength, performance and safety with the highest side rails in the industry, gripping, all weather surface, premium hardware, and seamless transitions on and off the walkramp.

"The IFDA Distributions Solution Conference has always served as the forum for Randall to feature our latest product innovations, ideas, and solutions," continued Jevaney. "This year we're not only bringing new concept products but demonstrating to the market that Randall is that one solution for premium temperature control products and best-in-class access products."

Visit Randall's booth #327 during the IFDA Distribution Solutions Conference at the Indianapolis Convention Center, October 21st – 23<sup>rd</sup>. You will experience the next generation of access products on the Randall Road Tour trailer, learn the latest best practices in temperature control, and understand the benefits of utilizing Randall for both your temperature control and access product needs.

### **About Randall Manufacturing & Randall Access**

Randall Manufacturing is a leading manufacturer of insulated products that help maintain proper temperature control within refrigerated trailers, warehouses and facilities across the country. What started with its flagship bulkhead line has grown into the most extensive temperature-control product portfolios for the logistics and warehouse industries.

Randall Access, Randall Manufacturing's newest division, offers a full portfolio of trailer access products including straight and folding walkramps, platforms, and steps for delivery vehicles.
