Visit Randall Access at NPTC 2014

National Private Truck Council Conference Booth #129

ELMHURST, IL (April 8, 2014) Randall Access, a division of Randall Manufacturing, a leader in delivery Access products, will be exhibiting at this year's National Private Truck Council (NPTC) Annual Conference & Exhibit taking place April 13-15 in Cincinnati, Ohio. Randall Access will be showcasing its market-changing Walkramps, Steps, and its 2014 concept product - the Elevated Platform- in booth #129.

"Drivers and fleet managers alike are looking for a line of Access products that not only raise the bar on performance, but also provide drivers with the safest, strongest equipment to get on and off their trailer," comments Fred Jevaney, president of Randall Manufacturing. "In today's delivery world, drivers are tasked with delivering faster, better and safer. The Randall Access product line of Walkramps, Steps, and soon Platforms are highly engineered to take on the toughest of environments with advanced features that keep the driver moving safely and efficiently."

NPTC is the only trade association in the US devoted exclusively to the interests of the private corporate trucking fleet industry and its partners. NPTC represents a cross-section of American manufacturers, distributors, retailers, and public service organizations ranging in size from family-owned small businesses and town utility fleets to Fortune 500 global conglomerates.

Randall Access will be featuring its Straight Walkramp, Folding Walkramp, Step and Elevated Platform. All engineered with features such higher side rails, a gripping surface, 6000 series Aluminum alloys and Grade 8, Cadmium-plated hardware that when put together create an Access product line that delivers full on safety, performance and control.

The NPTC Annual Conference & Exhibition takes place April 13 - 15, 2014 in Cincinnati, Ohio. The conference takes place at the Hilton Cincinnati Netherland Plaza Hotel and the Duke Energy Convention Center. Stop by booth 129 to learn more about Randall Access.
