RANDALL MANUFACTURING REINFORCES ITS COMMITMENT TO BE AN INDUSTRY TOTAL SOLUTION AT 2016 IFDA DISTRIBUTION SOLUTIONS CONFERENCE

Company highlights Temperature Control and Access products, features new trailer curtains and floor deployed platforms; giving customers greater options from a single-source provider.

- Randall unveils new rear and side door pull down curtains, the latest addition to its trailer curtain line
- Randall expands its Floor Deployed Platform (FDP) product series to feature larger work surfaces and safety features
- Company continues to hone its standing as the only single-source solution to the foodservice distribution industry of both Temp Control and Access products

ELMHURST, IL (October 3, 2016) Randall Manufacturing will showcase its Temp Control and Access products for the foodservice distribution industry at the IFDA Distribution Solutions Conference taking place October 16-18 at the Tampa Convention Center, Tampa, Florida.

Randall Manufacturing continues to take up the challenge to engineer and build innovative Temp Control and Access products that address the industry's need for products that accelerate performance, safety, and reliability from a single-source provider.

Fred Jevaney, president of Randall Manufacturing, said, "We pride ourselves on being able to provide our customers with the latest and most sophisticated solutions. This year the industry is facing greater regulatory pressure along with the ongoing mission to provide safer, stronger Access products that increase driver productivity and safety. We're looking forward to IFDA to present our latest innovations that help answer our customers' greatest challenges."

Highlights of Randall Manufacturing's Temp Control and Access portfolio that will be showcased on the company's Road Tour vehicle in **booth #621** include:

- **The New Rear and Side Door Pull Down Trailer Curtains** - Randall's latest trailer temp control curtain suits both the rear and side door. This Pull-Down Curtain mimics the operation of a roller-shade effectively providing temperature control and ease of operation. Side door version is expected to include the option of manual or powered operation. The Pull-Down Curtain is designed to help comply with regulatory requirements.
- **New FDP 4128** is an extension of the popular FDP 3123 with a 41" wide and 28" deep work surface, integrated ladder, and new grab handle. The integrated grab handle easily deploys and stows with the platform and ladder while providing the driver an additional point of contact for increased safety.

- **New FDP 3136** provides the driver with 36" of workable platform depth. This floor deployed platform's versatile design allows for use as a ramp-ready platform with a ladder. Additionally, the platform can be used in conjunction with a Randall walkramp for greater delivery safety and productivity.
- **Straight and Folding Walkramps** that are quickly becoming the industry's preferred walkramp feature Randall's ultra-durable, signature walk surface, strength of its interlocking panels, and unique driver-focused features.
- **Elevated Platform** – the industry's fastest to deploy and stow middle side door platform. Deploying to floor level, this expansive platform accommodates a walkramp or ladder in both the parallel or perpendicular positions. A true game-changing platform that complements the Randall Z Bulkhead to access both the frozen and refrigerated sections with middle door delivery.

Randall's Temp Control product line including - Bulkheads, Center Divide Systems, Trailer Curtains, and Pallet Covers will also be on display. Attendees can view the company's Center Divide System, Bulkhead and new Rear Pull-Down Curtain at the Vanguard National Trailer booth #452 in full-size application.

"Since the launch of the Randall Access line at IFDA 2011, many of the largest foodservice and convenience store distributors have chosen to utilize Randall Access product line with many more distributors expected to make the move to Randall in the near future," said Jevaney. "In conjunction with our proven line of premium Temp Control products, we are committed to providing the industry with a single-source for Temp Control and Access products."

About IFDA Distribution Conference

IFDA Distribution Conference 2016 convenes foodservice distributors, vendors and partners for three-day long forums and vendor expos focused on the latest equipment and technology, operational best practices and leadership skills. About Randall Manufacturing

Randall Manufacturing's Temp Control division is the nation's leading manufacturing of insulated products that help maintain proper temperature control within refrigerated trailers. What started with its flagship bulkhead line has grown into the most extensive temperature control product portfolios in the logistics industry.

Randall Access offers a full portfolio of trailer access products including straight and folding walkramps, platforms, steps, and ladders for delivery vehicles. For more information about Randall Access and Randall Temp Control, please visit www.randallaccess.com and www.randallmfg.com/temp-control
