Randall Access Introduces the FDP 3136LR to its Growing Line of Floor Deployed Platforms

- Randall Access's FDP (Floor Deployed Platform) 3136LR features a larger platform depth to improve drivers' safety with additional staging and maneuvering space.
- FDP 3136LR features Randall Access's signature walk surface ensuring continuity of surface within the entire Randall Access line.

Elmhurst, IL - April 5, 2017 – Randall Access, a Safe Fleet brand, continued its fast-paced innovation in its Floor Deployed Platform (FDP) line by introducing its new FDP 3136LR. The FDP line, including the new FDP 3136LR, continues to offer Randall's signature walk surface which affords drivers all-weather traction and a continuous surface when used with Randall Access walkramps.

"We are driven to continue to engineer and meet the market's demand for larger, safer platforms," said Fred Jevaney, president of Safe Fleet Truck & Trailer division. "The 3136LR provides drivers a 36" deep work surface along with the flexibility to use a ramp or the integrated ladder as the delivery environment warrants."

With a 31" wide x 36" deep walk surface, the FDP 3136LR provides drivers more space to safely stage and deliver products. The FDP 3136LR features an integrated ladder as well as a 1,000 lb working capacity allowing for the use of a walkramp.

Now, customers have a full range of Randall Access floor deployed platform options for the side doors which include the FDP 3123L, FDP 3434R, FDP 4334R and now the FDP 3136LR.

A Safe Fleet Brand

Key features of the 3136LR include:

- Constructed with extruded Aluminum, 6061 T6 alloy, the toughest material available today to withstand the cracking
- Randall's signature walk surface - aggressive, gripping, all-weather
- E-coated and powder coated tunnel to prevent rust
- Slider pads for easy deployment and stowage

See full product features and benefits on the FDP 3136LR product page online at www.randallmfg.com/access.

“The Food Safety Modernization Act (FSMA) is calling attention to all aspects of the trailer in food delivery; having a larger platform for drivers to maneuver while opening and closing the side door curtain helps promote driver safety and regulatory compliance,” commented Chuck Carey, vice president of sales.

About Randall Access

For over thirty years, Randall has pioneered the development of products that help protect inventory, improve productivity, and promote safety in the foodservice delivery world. Randall Access, a Safe Fleet brand, is Randall's newest division offering a full portfolio of trailer access products that is constantly growing including: Straight and Folding Safety Walkramps, middle and front door platforms, retractable steps, and ladders for delivery vehicles. The entire Randall Access product features its signature all-weather, aggressive walk surface to ensure continuity and driver safety.
