

THE RR LIFT ASSIST

The RR Lift Assist is changing the game and lives up to its name – it assists in lifting the ramp like no other lift assist. With one hand, on one side, the RR Lift Assist springs into action deploying and stowing with ease. The RR Lift Assist is engineered with the sole purpose of making the job easier and safer for the folks on the front lines.

Say hello to your new best friend.

- // **Save your energy.** The easiest lift assist to deploy and stow
- // **Save your back.** One side deployment – no more reaching or straddling
- // **Save your fingers.** Special lift assist panels and no-slam design protect fingers
- // **Save your money.** Built to last with the most advanced hardware and design

STRAIGHT & FOLDING WALKRAMPS

RR – Straight Walkramp // Specifications

Model	Ramp Length	Usable Width	Ramp Width	Ramp Height	Recommended Deck Height	Approx. Weight
RR-Straight	16'	24 3/8"	26 1/4"	4 3/8"	56"-66"	125 lbs.
RR-Straight	14'	24 3/8"	26 1/4"	4 3/8"	47"-56"	111 lbs.
RR-Straight	12'	24 3/8"	26 1/4"	4 3/8"	40"-46"	94 lbs.
RR-Straight	10'	24 3/8"	26 1/4"	4 3/8"	32"-39"	78 lbs.
RR-Straight	8'	24 3/8"	26 1/4"	4 3/8"	28"-32"	63 lbs.

RR – Folding Walkramp // Specifications

DEPLOYED						FOLDED		
Ramp Length	Usable Width	Ramp Width	Ramp Height	Recommended Deck Height	Approx. Weight	Folded Width	Folded Height	Folded Length
14'	24 3/8"	26 1/4"	4 3/8"	47"-56"	164 lbs.	30 1/8"	9 3/4"	89"

All ramps - 1,000 lb. load capacity
Testing of ramps was conducted between 15' and 20'

Good to Know:
Randall Ramps fit all competitive enclosures.

Optional Features:
Enclosure
Lift Assist

Randall Ramps is a product line of Randall Manufacturing. Patent pending.

RANDALL RAMPS

STRAIGHT & FOLDING WALKRAMPS

STRAIGHT & FOLDING WALKRAMPS

Welcome to the foodservice delivery world where having a bad day is not an option and relying on only the highest quality equipment is a necessity for success.

Randall Ramps are highly-engineered, advanced, ultra-durable, nothing-left-on-the-table line of walkramps. Combining 30 years of industry experience, feedback from the trenches and a little guts – we've created a line of walkramps that we're proud to put the Randall name on.

The titan of strength
Made from the strongest ramp material, 6000 series aluminum alloys and Grade 8, Cadmium-plated hardware.

We've turned it up – 6 times to be exact
Each panel has 6 individual, multi-directional fasteners. Twisting, turning, shaking – we've got your number.

A 75% open walk surface
Now we're talking...and walking.

Replaceable, repairable, easily maintainable panels – Just plain able.

This walk surface stands and delivers
The smartest, toughest, strongest surface underfoot helps bring you up and ease you down.

Side rail trifecta
Tallest side rail in the industry, beveled edge to hug the wheel, toughest material that won't think of moving.

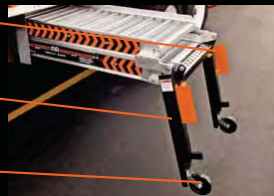

You can handle this
Toe plate equipped with ergonomic, comfortable, high-visibility handles.

Control is in charge
Smooth apron transition on every trailer deck, every time.

Lifting, loading, pulling, pushing – no time for pinching
This finger guard keeps all fingers holding their own.

Yo, legs. Meet open space
No more deploying the legs from the side of the ramp. That's design at work.

Work is a contact sport
A little help would be nice – 5" wheels ease ramp maneuverability.

THE RR LIFT ASSIST: CUSTOMER DRIVEN AND WE MEAN IT.

// Easiest Lift with Dominating Height
With one hand, on one side, the RR Lift Assist springs into action employing its dual gas and compression springs to ease the ramp up and down. Lifts to a dominating height of 28" from the bottom of the enclosure while accommodating air-ride slider suspension.

// Unprecedented Strength and Performance
The RR Lift Assist apron meets the trailer deck head-on with the smoothest transition. The side bracket keeps the apron in place with unprecedented strength — Grade 8 screws and Nylock nuts keep the apron on lock-down.

// Fingers – Keep Out
Three special lift assist panels lead off the ramp with narrower side-grates to protect fingers from the lift assist mechanism.
