

R//PLATFORMS

F D P

The FDP (Floor Deployed Platform) for side door delivery provides a 1,000 lb. weight capacity with only a 3" in-floor enclosure. The FDP's telescoping frame allows for a full 35" platform deck – that's 45% more platform space than the competition.

MORE Loading Space

35" of platform depth provides more loading capability and driver safety.

MORE Weight Capacity

Together the ladder and stabilizing leg provides a 1,000 lb. weight capacity; ladder alone provides 750 lb. weight capacity.

MORE Product Integrity

The FDP only requires 3" of floor space for 1,000 lb. weight capacity - competitive platforms require 4". The FDP uses less floor space which means more insulation, greater product integrity.

FDP Platform Specifications:

MATERIAL	WIDTH	DEPTH	STEPS	PRODUCT WEIGHT	WEIGHT CAPACITY
Aluminum	31.5"	35"	4	90 lbs.	1,000 lbs (ladder and stabilizing leg) 750 lbs (only ladder)

FDP Enclosure:

MATERIAL	HEIGHT	LENGTH	WEIGHT
E-Coated/Powder Coated Steel	3"	91"	320"
