

R/PLATFORMS

ELEVATED

THERE'S NO STANDARD HERE

Elevated Platform protected within a fully closed enclosure box

Elevated Platform pictured with 2015 Concept Product - Folding EL Walkramp

- // Mounts beneath the middle door - does not cut into the trailer floor or compromise insulation
- // Platform elevates to the trailer floor in less than 20 seconds
- // No transition plate - full use of the 48" x 52" platform
- // Delivery flexibility - folding ramp can be parallel or perpendicular with the trailer
- // Low cost installation - does not require customized trailer floor cross-member configuration

RANDALL ACCESS

TAKE ANOTHER LOOK AT A PLATFORM

One Purpose: Make the Foodservice Delivery World Better.

IMPROVE SAFETY

- // Larger work area to maneuver hand truck
- // Safer, larger surface to stage loads
- // Safety railings and door help to prevent falls

IMPROVE EFFICIENCY

- // Fully cube trailer – use platform for first-stop safety zone
- // Ability to close side door between loads – saving energy and money
- // Speed of delivery with greater confidence and maneuverability

IMPROVE FLEXIBILITY

- // Ability to deliver parallel with the trailer to accommodate narrow delivery stops
- // Utilize ladder or platform to accommodate varying deliveries
- // Ability to stage load on platform to increase delivery speed

Specifications:

MATERIAL	DIMENSIONS	WEIGHT	WEIGHT CAPACITY
Aluminum	48" x 52"	270 lbs.	1,000 lbs.

Area Required to Install Platform with Enclosure: 54" x 102"
