

Randall Center Divide System

Taking Temperature Control Right Down the Middle

CENTER DIVIDE SYSTEM

Randall Center Divide Systems offer flexibility to divide the trailer down the center to create as many as three distinct temperature zones and an ambient area. Randall Center Divide Systems tackle air flow, durability, and ease of configuration.

Flexibility

- Ability to configure to meet loading and unloading requirements
- Ease of maneuverability with movable or fixed systems
- Standard and custom sized panels

Efficiency

- Panels weigh 17% less than competition
- Greater ability to stage product prior to loading
- Half bulkhead shortens the load contributing to fuel efficiency
- Recessed airflow channels efficiently move air throughout system

Accessibility

- Ability to access compartments individually through access doors
- Half bulkhead provides ease of access

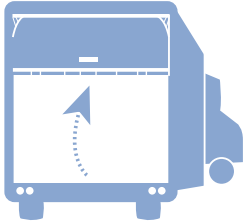

Durability

- Male/female siderails
- One-piece bottom extrusion
- Ballistic nylon seals
- No catch, recessed hardware
