## **KEURIG® COFFEE PACKAGING EQUIPMENT STAYS COOL AT M BLOCK & SONS**

**M. Block & Sons used InsulWall to create a modular, flexible, temperature-controlled room for its proprietary Keurig® packaging equipment.**

Elmhurst, IL (May 1, 2014) Randall Manufacturing provided M. Block & Sons with a modular, energy-efficient, GREEN curtain wall solution – InsulWall® - to create a temperature-controlled clean room for its proprietary coffee packaging equipment.

M Block & Sons is a leading provider of end-to-end supply chain solutions, including distribution. One of its distribution centers is dedicated to the packaging and distribution of Keurig® coffee. In 2013, this 209,000 square foot distribution center was extensively renovated and a clean, temperature and humidity-controlled room was needed to house proprietary coffee packaging equipment.

“We evaluated hard wall, dry wall, and lumber – these options were both costly and permanent. We needed a solution that was modular to grow with our business and provide superior thermal performance,” said Don Ward, Corporate Facilities Manager at M. Block & Sons.

**InsulWall created a clean, temperature-controlled room at M. Block & Sons in a matter of days.**

See Don Ward's video explaining his decision to use InsulWall, <http://bit.ly/1iDDHvs>

Keurig, a rapidly growing company, required M. Block & Sons to create a warehouse space that was flexible to grow with increased capacity. InsulWall was selected to create this new, clean, temperature-controlled room for its modularity, superior temperature-control performance, and flexibility; allowing M Block & Sons to handle increased packaging demands and additional future equipment.

## **A MODULAR WALL THAT SAVES ENERGY, SPACE, AND PROTECTS PROPRIETARY EQUIPMENT**

InsulWall installed quickly – hung from the ceiling joists, worked around ventilation systems, and easily framed out a series of roll-up doors. Within two weeks this large clean room was operational with little business interruption to the facility.

“We did a test of InsulWall’s temperature control last summer – it was 94° outside, 80° in the warehouse, and 74° in the packaging area – proving InsulWall’s effectiveness,” continued Ward.

“For organizations like M. Block & Sons, 3PLs, and businesses that distribute seasonal inventory, InsulWall is an ideal modular, economical, and GREEN solution,” said Kristine Grudis, Account Manager, Randall Manufacturing. “Creating spaces quickly and economically, with a product that has proven performance is what facility managers are looking for today and what InsulWall provides.”

### **About Randall Manufacturing & InsulWall**

For over ten years, Randall Manufacturing has been providing temperature-controlled products to warehouses, distribution centers, and workplaces. With an eye for sustainability, Randall was the first to utilize recycled materials to meet the growing need for GREEN building materials that contribute to LEED® scores. Randall’s flexible, modular curtain wall solutions include GREEN InsulWall, Industrial Curtain Walls, Noise Curtain Walls, and insulated pallet covers.
